

Dojo Rumble

A VR cultural immersion experience where you, a defeated foreign soldier, discover the depths of Japanese culture after being spared and taken in by the very samurai who bested you in combat.

Team members: Albert Alexandru, Melinte Cosmin, Moloce Alin

Description

(1) Why: Traditional games often portray samurai culture through pure combat, missing the rich cultural aspects of feudal Japan. By placing players in the vulnerable position of a defeated warrior who must learn a new way of life, we create a unique perspective that naturally drives cultural discovery and personal growth.

(2) How: Beginning with a battle scene where the player's defeat is inevitable, the game transitions into a journey of discovery within a historically accurate dojo. Players learn about Japanese culture through daily activities, observation and training.

(3) What is different: Unlike other samurai-themed games that focus solely on combat mastery, Dojo Rumble begins with defeat and transforms into a deep cultural immersion. The player's perspective as a foreign warrior provides a natural vehicle for learning about Japanese customs, philosophy.
